CONTENTS OF VOLUME 71

NUMBER 1—SEPTEMBER 1990

Electron-gas theory of the chemical shift
By C. J. Grayce and R. A. Harris 1

A reaction-path description of the HO_2 reactive system
By F. Schneider, L. Zülicke and X. Chapuisat 17

Renner–Teller, spin–orbit and Fermi-resonance interactions in $X^2\Pi$ NCS investigated by LIF spectroscopy
By F. J. Northrup and T. J. Sears 45

Far-infrared studies of molecular dynamics and interactions in N,N-dimethylformamide
By R. Buchner and J. Yarwood 65

An empirical three-atom potential for xenon
By E. Rittger 79

Evaluation of Brillouin scattering intensities from rare gas crystals. II. Introduction of short-range corrections
By P. Gallo, V. Mazzacurati and G. Ruocco 97

Statistical-mechanical analytical equation of state for fluid mixtures
By G. Ihm and E. A. Mason 109

Shear viscosity in monatomic liquids: a simple mode-coupling approach
By U. Balucani 123

Semiclassical statistical mechanics of a ν-dimensional fluid of hard ν-spheres. Part II. Equilibrium properties of a dense hard ν-sphere fluid
By J. P. Sinha and S. K. Sinha 135

Simple MSA solution and thermodynamic theory in a hard-sphere Yukawa system
By Mitsuaki Ginoza 145

Binary Yukawa mixtures: comments on the compressibility–energy thermodynamic inconsistency in the mean spherical approximation
By D. J. Gonzalez, L. E. Gonzalez and M. Silbert 157

Lineshape analysis of the ^{13}C Overhauser shift in organic conductors and semiconductors
By B. Gotschy and G. Denninger 169

Molecular hyperfine-structure calculations using an uncoupled representation
By S. H. Young and S. G. Kukolich 181

Symmetry of ensemble averages in smectic liquid crystals
By M. W. Evans 193

Preliminary Communication

***Ab initio* calculation of relative ion concentrations of protonated water clusters at equilibrium**
By E. P. F. Lee, J. M. Dyke, A. E. Wilders and P. Watts 207

NUMBER 2—10 OCTOBER 1990

NMR spectra from powdered solids spinning at any angle and speed: simulations and experiments
By N. K. Sethi, D. W. Alderman and D. M. Grant 217

Orientational correlations in liquid CO: neutron-diffraction measurements
By M.-C. Bellissent-Funel, U. Buontempo, C. Petrillo and F. P. Ricci 239

Structure of liquid chlorine from neutron-diffraction measurements
By M.-C. Bellissent-Funel, U. Buontempo, C. Petrillo and F. P. Ricci 253

Structure and thermodynamics of asymmetric molecules: Application to linear triatomic dipolar molecules
By A. L. Nichols III and D. F. Calef 269

The pressure second virial coefficient of vibrating symmetric triatomic molecules
By S. Murad, D. P. S. Sethi and J. G. Powles 297

Simulated light-scattering experiments on liquid chlorine
By A. De Santis, A. Gregori and D. Rocca 307

Reactive scattering of a supersonic fluorine-atom beam: F + C_2H_5I, C_3H_7I, $(CH_3)_2CHI$
By J. J. Harkin, R. D. Jarvis, D. J. Smith and R. Grice 323

Configuration dependences for cross-beam molecular scattering in an intense laser field
By L. Eno 345

A time-saving algorithm for generalized Langevin-dynamics simulations with arbitrary memory kernels
By L. G. Nilsson and J. A. Padró 355

Non-local free-energy density-functional theory applied to the electrical double layer. Part I: Symmetrical electrolytes
By Z. Tang, L. Mier-y-Teran, H. T. Davis, L. E. Scriven and H. S. White 369

Lennard-Jones mixtures in slit-like pores: a comparison of simulation and density-functional theory
By S. Sokolowski and J. Fischer 393

Molecular-dynamics simulation of molten alkali carbonates
By J. T. W. M. Tissen and G. J. M. Janssen 413

The square-well fluid: its properties and representation. Part I: Compressibility factor
By D. A. de Lonngi, P. A. Lonngi and J. Alejandre 427

The dynamics of hard spheres in a collapsing spherical container
By T. Vladimiroff, Y. P. Carignan, A. K. Macpherson and P. A. Macpherson 441

Preliminary Communication

Tunable far-infrared laser spectroscopy of van der Waals bonds: the $j_{k_c} = 1_0 \leftarrow 0_0$ Σ bending vibration of Ar–$^{14}NH_3$
By Dz-Hung Gwo, M. Havenith, K. L. Busarow, R. C. Cohen, C. A. Schmuttenmaer and R. J. Saykally 453

NUMBER 3—20 OCTOBER 1990

Kinetics of outer-sphere electron transfer in non-Debye solvents with two characteristic relaxation periods
By M. V. Basilevsky and G. E. Chudinov 461

Deuteron double-quantum NMR imaging of molecular order and mobility in solid polymers
By E. Günther, B. Blümich and H. W. Spiess 477

Determination of static dielectric constant-temperature–density surfaces of a Stockmayer fluid by perturbation theory
By S. Goldman 491

Monte Carlo simulation of a two-dimensional hexagonal monolayer of point dipoles
By R. N. Sane 509

Thermal conductivity, heat capacity and phase diagram of cyclooctanol in liquid, solid and glassy crystal states under high pressure
By O. Andersson and R. G. Ross 523

Molecular-dynamics simulation results for the pressure of hard-chain fluids
By M. A. Denlinger and C. K. Hall 541

Smectic-A, crystalline and columnar ordering in the system of hard parallel cylinders
By R. Holyst and A. Poniewierski 561

Molecular-dynamics simulation of water clusters with ions
By E. N. Brodskaya and A. I. Rusanov 567

Computer simulations of liquid water: treatment of long-range interactions
By M. Prevost, D. Van Belle, G. Lippens and S. Wodak 587

A variational method for the calculation of spin-rovibronic levels of Renner–Teller triatomic molecules
By S. Carter, N. C. Handy, P. Rosmus and G. Chambaud 605

Simulation of collision-induced absorption spectra rare-gas gaseous mixtures including ternary effects
By S. Weiss 623

Model suspensions of deformable particles
By M. J. Grimson and G. C. Barker 635

The Nosé bond constraint for diatomic molecules
By G. P. Morriss and Kok Kean Yim 653

Adiabatic and diabatic representations, coordinate and unitary transformations: coupled oscillators
By J. G. Frey 659

Research Notes

An analysis of the Verdet constant
By D. M. Bishop and S. M. Cybulski 667

NUMBER 4—NOVEMBER 1990

***Ab initio* investigation of the vibronic structure of the C_2H_2 spectrum. II. Calculation of diabatic potential surfaces for the three lowest-lying electronic states in C_2H**
By M. Perić, R. J. Buenker and S. D. Peyerimhoff 673

***Ab initio* investigation of the vibronic structure of the C_2H spectrum. III. Calculation of vibronic energies and transition probabilities in the $X\,^2\Sigma^+$, $A\,^2\Pi$ system**
By M. Perić, S. D. Peyerimhoff and R. J. Buenker 693

Equilibrium distribution functions for plasma–molecular layers
By A. S. Usenko 721

High-resolution infrared spectrum and analysis of the ν_{11}, $A_{2u}(B_2)$ fundamental band of $^{12}C_6H_6$ and $^{13}C^{12}C_5H_6$
By H. Hollenstein, S. Piccirillo, M. Quack and M. Snels 759

Characterization of porous silica gels prepared via the sol–gel process by ^{29}Si CP/MAS solid-state NMR spectroscopy
By K. L. Walther, A. Wokaun and A. Baiker 769

Information theory applied to the transport coefficients of Lennard-Jones fluids
By D. M. Heyes and J. G. Powles 781

The effect of confinement on the isotropic–nematic transition
By M. M. Telo da Gama, P. Tarazona, M. P. Allen and R. Evans 801

Potential energy functions for atomic solids. II. Potential functions for diamond-like structures
By J. N. Murrell and J. A. Rodriguez-Ruiz 823

NEMD investigation of the rheology of oblate molecules: shear flow in liquid benzene
By A. Baranyai and D. J. Evans 835

A comparison between the PISA model and the RAM theory: their abilities to reproduce internal energy as calculated by Monte Carlo simulations
By M. Luhmer, A. Dejaegere and J. Reisse 843

Pulsed neutron diffraction of liquid n-butane
By M. Alvarez, F. J. Bermejo, W. S. Howells, E. Enciso, N. G. Almarza and M. Garcia-Hernandez 865

Theory and simulation of chain-molecule fluid structure
By J. R. Elliott Jr and U. S. Kanetkar 871

Attractive-force effects in chain molecular fluids
By J. R. Elliott Jr, U. S. Kanetkar and V. J. Vasudevan 883

Research Note

Total cross-section for the ionization of molecules by thermal-energy collision with metastable neon atoms
By A. Aguilar, S. Bianco, B. Brunetti, M. Gonzalez and F. Vecchiocattivi 897

Preliminary Communications

Anisotropic nuclear spin relaxation of cholesterol in phospholipid bilayers
By M. F. Brown 903

Free-energy computations for mixtures of Stockmayer and polarizable Lennard-Jones fluids
By G. C. A. M. Mooij, S. W. de Leeuw, C. P. Williams and B. Smit 909

Erratum

The IF B–X system. New high resolution L.I.F. spectrum and analysis
By G. Gouédard, N. Billy, B. Girard and J. Vigué 913

NUMBER 5—10 DECEMBER 1990

Monte Carlo study of hard-body fluids at a hard wall: pure fluids and mixtures of spheres, heteronuclear dumbbells and linear triatomics
By I. Nezbeda, M. Rami Reddy and W. R. Smith 915

Rotational insertion bias: a novel method for simulating dense phases of structured particles, with particular application to water
By R. F. Cracknell, D. Nicholson, N. G. Parsonage and H. Evans 931

Reformulation of the site–site interaction theory for molecular fluids
By M.-E. Boudh-Hir, G. Aloisi and R. Guidelli 945

Exact simulation of multiple-quantum dynamics in solid-state NMR: implications for spin counting
By M. Munowitz 959

Behaviour of a coupled two-spin-$\frac{1}{2}$ system in the presence of a spin-locking radio-frequency field. Relaxation and Hartmann–Hahn transfers
By K. Elbayed and D. Canet 979

Reduced effective Hamiltonians for degenerate excited vibrational states of tetrahedral molecules: application to $2\nu_2$, $\nu_2 + \nu_4$ and $2\nu_4$ of CH_4
By Vl. G. Tyuterev, J. P. Champion and G. Pierre 995

Fragment pair correlations in the vibrationally mediated photodissociation of H_2O_2: rotation–vibration coupling in the third OH stretching overtone state
By M. Brouard, M. T. Martinez and J. O'Mahony 1021

Calculated spectra for the N_2–Ar van der Waals complex
By A. G. Ayllón, J. Santamaría, S. Miller and J. Tennyson 1043

Theoretical calculations of the Rydberg spectra of ArH
By G. Theodorakopoulos, I. D. Petsalakis and R. J. Buenker 1055

Vibronic intensities in the electronic spectra of transition-metal complex ions. Part VII. The $\Gamma_8(^2T_{2g}) \rightarrow \Gamma_8(^4A_{2g})$ electronic transition of the $ReBr_6^{2-}$ ion in Cs_2ZrBr_6
By R. Acevedo, G. Diaz, J. R. Letelier and C. D. Flint 1063

The vibronic structure of mixed-ligand osmium(IV) complexes. Part I. Low-energy levels of $OsCl_5X^{2-}$ and *cis*-$OsCl_4X_2^{2-}$ (X = Br, I)
By D. Strand, R. Linder and H.-H. Schmidtke 1075

Investigation of the structure of an ammonium nitrate–calcium nitrate eutectic melt using isotopic difference methods in neutron diffraction
By A. K. Adya and G. W. Neilson 1091

Zn^{2+} hydration and complexation in aqueous electrolyte solutions
By D. H. Powell, P. M. N. Gullidge, G. W. Neilson and M. C. Bellissent-Funel .. 1107

Multipole cross-sections in polarized laser fluorescence for atom–diatom systems
By W.-K. Liu and A. S. Dickinson 1117

Comparison of quantum and classical calculations of thermal-conductivity cross-sections governing the Senftleben–Beenakker effect for HD–He mixtures
By W.-K. Liu, A. S. Dickinson and F. R. W. McCourt 1131

Photofragment orientation as a probe of near-threshold non-adiabatic phenomena in the photodissociation of ICN
By J. F. Black, E. Hasselbrink, J. R. Waldeck and R. N. Zare 1143

An adiabatic energy-level expression for anharmonic hydrogen-bonded systems
By A. McNichols and T. Carrington, Jr 1155

Preliminary Communication

Infrared diode-laser spectroscopy of the ground state of SnH ($X\ ^2\Pi_{1/2}$)
By U. Simon, M. Petri, W. Zimmermann and W. Urban 1163

Erratum

Chemical potentials of model and real dense fluid mixtures from perturbation theory and simulations
By A. Lotfi and J. Fischer 1171

NUMBER 6—20 DECEMBER 1990

Molecular-dynamics simulation of methane adsorbed on MgO: Evidence for a Kosterlitz–Thouless transition
By Ali Alavi 1173

Quadrupolar hard Gaussian-overlap fluid
By T. Boublík, C. Vega, S. Lago and M. Díaz Peña 1193

The temperature and density dependences of the self-diffusion coefficient and the shear viscosity of liquid trichloromethane
By K. R. Harris, Hanh Ngoc Lam, E. Raedt, A. J. Easteal, W. E. Price and L. A. Woolf 1205

Liquid–vapour coexistence of the Gay–Berne fluid by Gibbs-ensemble simulation
By E. de Miguel, L. F. Rull, M. K. Chalam and K. E. Gubbins 1223

The group theory of trigonal and tetrahedral molecule rotations in trigonal and tetrahedral crystal fields
By M. V. Smalley and P. C. Ball 1233

Electrostatic interaction in macro-ionic solutions and gels
By M. V. Smalley 1251

The relation between zero-field splittings and distortions along the normal coordinates in transition metal complexes
By K. Fukui, H. Ohya-Nishiguchi and N. Hirota 1269

Phase conventions that render all matrix elements of the vibration–rotation Hamiltonian real
By C. di Lauro, F. Lattanzi and G. Graner 1285

On the possibility of determining ground state *K*-structure parameters from perturbed vibration–rotation spectra of symmetric-top molecules
By C. di Lauro and F. Lattanzi 1303

s and d Rydberg complexes of NO probed by double-resonance multiphoton ionisation in the region $n^* = 5$ to $n^* = 25$; multichannel quantum defect analysis. Part II
By D. Gauyacq, A. L. Roche, M. Seaver, S. D. Colson and W. A. Chupka 1311

On neighbouring-level effects, and the validity of the rotating-wave approximation, for a quasi-continuum five-level model doorway system
By S. Nakai, A. B. Yamashita and W. J. Meath 1333

Vacuum UV spectroscopy and dynamics of CHF_3: analysis of emissions and evidence for parent ion emission
By J. C. Creasey, I. R. Lambert, R. P. Tuckett and A. Hopkirk 1355

Vacuum UV spectroscopy and dynamics of CF_3Cl, CF_2Cl_2 and $CFCl_3$: analysis of emissions and evidence for parent ion emission from CF_3Cl^+
By J. C. Creasey, I. R. Lambert, R. P. Tuckett and A. Hopkirk 1367

A systematic intermolecular potential method applied to chlorine
By R. J. Wheatley and S. L. Price 1381

Alternative decoupled representations for the dynamics of van der Waals molecules: a test for the He, Ne–O_2 systems
By F. A. Gianturco, G. Delgado-Barrio, O. Roncero and P. Villarreal 1405

Research Notes

Inconsistent kinetic energy functionals of electron gases in the presence of inhomogeneous magnetic fields
By C. J. Grayce and R. A. Harris 1429

Ground state constants A_0 and D_0^K of $^{13}CH_3I$ from perturbation-allowed transitions
By R. Antilla, S. Alanko, V.-M. Horneman and M. Koivusaari 1433

Index of authors (with the titles of papers) 1437
